INDEPENDENT AUDITORS' REPORT

To the Shareholders and Board of Directors of
Performa Reserve Fund Ltd. – Performa International Bond Fund (USD)

We have audited the accompanying financial statements of Performa Reserve Fund Ltd.–Performa International Bond Fund (USD) (the "Fund"), which comprise the statement of net assets, including the condensed schedule of investments, as at December 31, 2019, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Fund's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2019, and the results of its operations and changes in its net assets for the year then ended in accordance with accounting principles generally accepted in United States of America.

Actual results could differ from those estimates.

The Fund is classified as an investment company as defined in Accounting Standards Update (“ASU”) 2013-08, Investment Companies (Topic 946): Amendments to the Scope, Measurement and Disclosure Requirements. Options	\$ (61,675)	\$ 37,122	33

The Fund's derivatives are not governed by a master netting agreement.

6. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (level 3 measurements). The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;

Level 2: Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;

Level 3: Inputs that are unobservable.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors.

6. FAIR VALUE OF FINANCIAL INSTRUMENTS (cont'd)

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes observable requires significant judgment by the Investment Advisor. The Investment Advisor considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Investment Advisor's perceived risk of that instrument.

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as futures contracts, are typically classified within level 1 or level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

OTC derivatives, including currency forwards, are valued using third party quotations which are calculated using straight line interpolation of mid forward points as reported by time zone close from the market on which the foreign currency primarily trades. Certain OTC derivatives, such as generic forwards, have inputs which can generally be corroborated by market data and are therefore classified within level 2.

Those OTC derivatives that have less liquidity or for which inputs are unobservable are classified within level 3. While the valuations of these less liquid OTC derivatives may utilize some level 1 and/or level 2 inputs, they also include other unobservable inputs which are considered significant to the fair value determination. At each measurement date, the Investment Advisor updates the level 1 and level 2 inputs to reflect observable inputs, though the resulting gains and losses are reflected within level 3 due to the significance of the unobservable inputs. There were no level 3 financial instruments held during the year or at year end.

The following table presents the financial instruments carried on the Statement of Net Assets and liabilities by caption and by level within the valuation hierarchy as of December 31, 2019:
